4) FIRST-AID MEASURES

4.1 Description of first-aid measures

General

In all cases of doubt or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If casualty is unconscious place in recovery position and seek medical advice.

Inhalation

Remove affected person to fresh air. Keep person warm and at rest. If breathing has stopped, is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.

Ingestion

If swallowed seek medical advice immediately and show the container or label. Keep person warm and at rest. Do not induce vomiting.

Skin contact

Remove contaminated clothing immediately. Wash skin thoroughly with soap and water. Do not use solvents or thinners.

Eye contact

Rinse immediately with plenty of water for 15 minutes with open eyelids. Remove contact lenses if any and continue rinsing. Seek immediate medical attention.

4.2 Most important symptoms and effects, both acute and delayed

Inhalation

No specific symptoms known.

Ingestion

Symptoms following overexposure may include the following: Nausea, vomiting

Skin contact

Prolonged skin contact may cause redness and irritation.

Flat Eggshell

Eye Contact

May cause temporary eye irritation.

- 4.3 Indication of any immediate medical attention and specific treatment needed
None

5) FIREFIGHTING MEASURES

- 5.1 Extinguishing media

Suitable extinguishing media

Alcohol resistant foam, carbon dioxide (CO₂), extinguishing powder, water mist.

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

- 5.2 Special hazards arising from the substance or mixture

No unusual fire or explosion hazards noted.

Hazardous combustion products

Thermal decomposition or combustion may liberate carbon oxides or other toxic gases or vapours.

- 5.3 Advice for firefighters

Protective actions during firefighting

Cool containers exposed to heat with a water spray and remove them from the fire area if it can be done without risk. Control run-off water by containing and keeping it out of sewers and watercourses.

Special protective equipment for firefighters

Use protective equipment appropriate for surrounding materials and respirator.

6) ACCIDENTAL RELEASE MEASURES

- 6.1 Personal precautions, protective equipment and emergency procedures

Provide adequate ventilation. See protective measures under points 7 and 8.

- 6.2 Environmental precautions

Do not allow to enter into soil or subsoil, surface water or drains.

- 6.3 Methods and materials for containing and cleaning up

Absorb spillage with liquid binding materials.

Clean contaminated areas immediately.

- 6.4 Reference to other sections

See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

7) HANDLING AND STORAGE

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

- 7.1 Precautions for safe handling
Avoid contact with skin and eyes. Avoid inhalation of vapour, spray or mist.
Put on appropriate personal protective equipment (see Section 8).
- 7.2 Conditions for safe storage, including any incompatibilities
Store between the following temperatures: 5 to 40°C (41 to 104°F). Store in accordance with local regulations.
Store in a dry, cool and well-ventilated area.
Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers.
Use appropriate containment to avoid environmental contamination. Store in original container, protected from direct sunlight.
- 7.3 Specific end uses
None specified

8) EXPOSURE CONTROLS/PERSONAL PROTECTION

- 8.1 Control parameters
Occupational exposure limits
2-(2-BUTOXYETHOXY)ETHANOL
Long-term exposure limit (8-hour TWA): OEL 10ppm 67,5mg/m³
Short-term exposure limit (15-minute): OEL 15ppm 101,2mg/m³

OEL = Occupational Exposure Limit
- 8.2 Measures to control exposure
Appropriate engineering controls
Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Personal protection
Hygiene measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking, using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye and face protection
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mist or dust.

Flat Eggshell

Skin protection

Chemical-resistant, impervious gloves complying with approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. 4 - 8 hours (breakthrough time), material: nitrile rubber (0,5 mm thickness).

Body protection

Working clothes

Respiratory protection

No special protection is required. In case of insufficient ventilation, wear suitable respiratory equipment.

Environmental exposure

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
